Is Your Company Earning the Profits You Expect?

**Get an Objective Business Assessment of Your Company
Compared to Other Companies in Your Industry!**

**Improve Your Profits * Improve Your Financial and
Accounting Reporting with Lower Costs *
Part-Time and Interim Services**

There are a couple of reasons that a company might want to utilize a financial and accounting consulting firm.

- * A growing business can reach a point when they need a higher level of financial and accounting support. However, adding a new position may not be justifiable, whether because of the expense or because there isn't enough work for a full-time employee.
- * A struggling business might need help in turning things around and improving its profit position.

We can provide a high-level of financial management support on a part-time, cost-effective basis. We can help you in a variety of ways, based upon your specific needs. Our **Business Assessment** can provide you with detailed information about the strengths and weaknesses of your business operation at a very affordable price.

With our assistance, you can:

- * focus on your core activities without worrying too much about financial issues
- * have a better understanding of the financial issues impacting your business
- * make better decisions by having current financial information available to you
- * have a high-level professional helping to oversee the financial side of your business
- * have an ongoing analysis of profitability and cash flow
- * improve your planning process through budgeting and monitoring your operations
- * get help with any special circumstances that arise

This is a very effective option for companies that want the help of a high-level finance and accounting professional without making the commitment to hiring a full-time staff member. In other situations, a larger company might require additional professional resources for a special financial project. We can help with that as well.

We provide part-time or interim financial and accounting services. You can receive the service and support of a highly qualified CFO and Controller only as you need it, without having to pay a full-time salary or benefits, or receive basic accounting services. Many companies utilize this type of professional service. But many of the professional service companies charge very high fees. TYZ can help keep those rates at a lower level because we don't have the high overhead costs of these other firms.

In addition, we can help you with a cost-effective sales and marketing and lead generation program as well as a variety of business expense recovery and savings services through our affiliate partners.

Professional Experience

Seasoned financial executive with hands-on management experience in all facets of accounting, finance and business operations, focused on profit improvement, business development and growth situations. 35 years of widely varied experience.

If you would like to have a no-cost, no-obligation conversation about your business, please call us. We'd love to help you out in making your business as successful as possible and reduce your personal stress. Don't keep waiting, hoping that everything will turn out well and your business will grow with no bumps in the road. As they say, hope is not a plan.
